PERSONAL PROFILE

With a solid foundation in cloud computing, specifically Amazon Web Services (AWS), I'm highly skilled in AWS infrastructure management, and proficient in Infrastructure as Code (IaC) with AWS CloudFormation and Terraform. I am also experienced in implementing CI/CD pipelines using AWS CodePipeline, CodeBuild, and CodeDeploy for efficient software deployment. As an ardent learner, I constantly seek to master new technologies to keep my skills relevant and competitive.

PROJECTS

- Evaluated and selected the best infrastructure for developing a telehealth video conferencing application, including a thorough cost study.
- Used Terraform Cloud and seamless CI/CD integration to orchestrate a containerized application deployment on Amazon Web Services Elastic Container Service (AWS ECS).
- Developed Python script to automate the creation of JIRA tickets upon GitHub events.
- Created a streamlined Continuous Integration/Continuous Deployment (CI/CD) workflow for AWS Fargate web application deployment.
- Designed a serverless architecture using Amazon Simple Notification Service (SNS), Amazon Simple Queue Service (SQS), and AWS Lambda to improve system efficiency and scalability.
- Designed and implemented a CI/CD pipeline using Terraform, Jenkins, and AWS to automate infrastructure provisioning, application deployment, and networking configuration for a REST API.
- Built an automated CI/CD pipeline leveraging Jenkins, ArgoCD, Kubernetes (EKS), Docker, and GitHub to ensure seamless deployment of a Reddit Clone App with automatic updates on code changes.
- Integrated Prometheus and Grafana for real-time monitoring and observability of the Kubernetes cluster, enhancing system reliability and performance insights.
- Developed a fully automated CI/CD pipeline using Jenkins, Docker, ArgoCD, and AWS EKS, streamlining application build, test, deployment, and update processes upon GitHub repository changes.

WORK EXPERIENCE

October 2021 - Present

Cloud DevOps Engineer, Cloudboosta Technology Solution.

- AWS CodePipeline Integration for Seamless Deployment
- Automated Deployment Pipeline with AWS CodePipeline and AWS Lambda
- Streamlined Deployment Workflow with AWS CodePipeline and Amazon ECS
- Automated Deployment Pipeline with Jenkins, GitHub Actions, ECS, and Terraform
- Streamlined Jenkins Pipeline for Dockerized Web Application Deployment with GitHub Integration and Terraform
- Implemented budgeting approaches within the AWS Budgets framework, allowing exact cost and resource consumption tracking in an AWS account.
- Developed and implemented optimized CI/CD pipelines, automating important software build, testing, and deployment operations.

- Used Amazon CloudFront to enable the safe and effective global delivery of Cloudboosta's static website, ensuring minimal latency and quick data transfer for foreign consumers.
- Created and deployed a dynamic CloudFormation template to allow for the easy creation of a highly available WordPress server from the ground up, a versatile asset that has been used in a variety of organizational use cases.

June 2021 –September 2021

Power BI Developer, Coven Works.

- Identified the main reason employees were leaving a company and suggested the best recruitment source after analyzing the 13-year HR Dataset for that company.
- Discovered the best sales channel, profitable product, and stores for a company with stores across 35 countries by examining the company's sales dataset.
- Helped increase the overall profit of a company by identifying products with an extremely high cost of production after exploring the 10-year data generated by this company:
- Identified the city with the highest year-over-year increase in sales for a company having stores across 4 cities after inspecting the 2-year sales dataset and gave suggestions to help replicate that success across the board.

September 2015 – October 2019

Technical Operator, Nigeria Bottling Company (A member of the Coca-Cola Hellenic Group), Asejire, Benin & Lagos Plant, Nigeria.

- Effectively maintained production lines for optimum production on a daily basis.
- Implemented and standardized Lean Manufacturing tools on the production lines.
- Properly planned and executed efficient production flow for a daily 85% system line efficiency at minimum.

EDUCATION

- Bachelor of Science in Mechanical Engineering, University of Ibadan, Ibadan, Oyo State, Nigeria. Second Class (Upper Degree).
- MBA with specialization in Fintech & Blockchain Nexford University.

CERTIFICATIONS

- o AWS Solutions Architect Associate
- o AWS Developer Associate
- o AWS DevOps Engineer (In-view)
